APPLICATION

Cardio Support Sachet ingredient studies concluded that an influence on the cardio vascular system, cholesterol levels as well as heart health was achieved, which ingredients are:

- Vitamin C, a PubMed published study effect of vitamin C on serum lipids and electrolyte profile with a dosage of 200mg/kg body weight produced a significant decrease in total cholesterol LDL in the test group.
- Beta-Sitosterol is one of several phytosterols (plant Sterols) with chemical structure which is similar to that of cholesterol.
- The Vitamins B6, B9 and B12 have been used in combination with the various ingredients in heart health studies and general well-being studies.
- Effect of oral dosage of Vitamin E on Cholesterol was conducted by Ohio State University – there was profound effects on cholesterol levels in the experiments – approximately 46 studies have been concluded in the effect of tocopherol do have on cholesterol lowering.
- The combination of Taurine, Lysine, Proline and Arginine have been extensively researched and the inclusion of these amino acids are essential.

Cardio Support's calcium and magnesium content is a natural proven bioavailable substance. These two essentials minerals are involved in enzyme reactions, nerve functioning, muscle relaxing and maintaining healthy blood vessels.
